

**ACCO Brands REACH Article 33 Communication**

**Date: 22 August 2023**

The European Union's REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) Regulation imposes requirements on manufacturers, importers, and downstream users of chemicals, including chemicals contained in articles and preparations, that are imported into the EU for distribution, sale, or use by third parties.

Article 33 of REACH requires ACCO Brands to provide information about "substances of very high concern" ("SVHCs") if any SVHCs are present in a concentration exceeding 0.1% of the weight of an article that we supply in the EU.

Based on information currently available to us, no substances from the SVHC candidate list are present in our products in a concentration exceeding 0.1% (w/w), except those included into the table below.

The products do not present any hazard to the end users.
